**Parenting Tip of the Month**

The data continues to grow on the dangers the internet can pose to children and on the benefit of time spent in play, both indoors and outdoors. For younger children this means play that uses their imaginations and does not include the internet. For older children, it may include such things as playing board games, doing puzzles and hiking. Whatever the age of your children, time without the internet supports good growth. So, spend time playing as a family and you will see the positive benefits for your children!
